

MealScout 2026 Beta Rep Field Packet

1/2

First job: find hosts, send tagged links, report proof, then use hosts to get trucks.

What you are doing first

MealScout starts a beta territory by solving the food truck parking problem. Food trucks need reliable places to serve. Hosts with parking can make money from that space. Your job is to start those conversations, send the correct tagged MealScout link, and report what happened.

#	Move	What it means
1	Create account + tag	Make your MealScout account first. Customize your affiliate tag before outreach.
2	Find hosts first	Look for bars, breweries, stores, lots, workplaces, churches, markets, venues, property owners.
3	Send host link	Tell them hosts set their own price, availability, dates, rules, and number of truck spots.
4	Report proof	Send Thomas contact info, result, tagged link sent, screenshot/proof, and next action.
5	Use hosts to get trucks	Once host spots exist, contact trucks with a real reason to join: places to park and serve.
6	Help bookings happen	A confirmed booking is the proof the territory is working.
7	Branch later	Restaurants, bars, events, chefs, caterers, suppliers, diners, affiliates, and trust tools come after the host-truck loop starts.

Good host targets

- Bars, breweries, stores, lots, workplaces, churches, markets, venues, property owners.
- Enough space for a truck.
- Someone there can approve the location.
- The business would benefit from extra food traffic.
- They can set dates, rules, and price.

Good truck targets

- Actively operating food trucks.
- Trucks posting schedules on Facebook/Instagram.
- Trucks looking for new locations.
- Trucks that rely on DMs to find places.
- Trucks that need better visibility after host loop works.

Thomas' role

- Onboards interested people.
- Closes hot leads.
- Contacts new accounts if they sign up first.
- Fixes confusion.
- Takes over when you spark interest.

Links and reporting

Who	Link	When to use
Host / parking location	/host-location-partner	Use first in beta. Send after explaining host controls price and availability.
Food truck	/claim-truck	Use when a truck needs to claim or activate its truck listing.
Restaurant / bar / owner	/customer-signup?role=business	Use when a food business is ready to make an owner account.
Restaurant explainer	/for-restaurants	Use when they need a softer page before signup.
Host explainer	/for-hosts	Use when a host wants to understand the program before signup.
Local/customer	/scout	Use for locals who want to browse food options.
General tracked share	/ref/{your-tag}	Use when you want one general tracked referral link.

Affiliate tag rule

- Customize your affiliate tag before outreach.
- Do not share MealScout links without your tag if you want credit.
- Use Share Directory/referral links whenever possible.
- Do not remove or change the tag from shared links.

If you shared a raw link

- You must report who you contacted.
- Send business/contact, proof, link sent, result, date/time.
- Thomas can manually credit only if the contact can be matched.
- No report means no reliable credit.

Report every contact

- Rep name.
- Date/time.
- Business/contact.
- User type.
- Contact method.
- Exact link sent.
- Result.
- Screenshot/proof.
- Next action.

Text Thomas	What to send
Rep	[your name]
Target	[business/contact + phone/social/email]
Type	[host / truck / restaurant / bar / etc.]
Result	[interested / link sent / account created / no / follow-up]
Link sent	[exact tagged link or raw link]
Proof	[screenshot attached]
Next	[Thomas call / I follow up / onboarding needed / ignore]

Plain rule

Do not explain the whole company. Get the host or truck interested, send the right tagged link, and report the result. If you send a raw link, report it immediately or you may not get credit.

Scripts, Product Facts, Scorecard

2/2

Use simple language. Spark interest, send the link, report proof.

Host script

- Do you ever have space where a food truck could park and serve?
- MealScout lets you list your location for free.
- You set your own price, availability, dates, rules, and how many trucks you can host.
- Food trucks can discover and book your spot.
- Want me to send you the setup link?

Truck script

- We are adding host locations where food trucks can book places to serve.
- The main goal is helping trucks find places to park.
- You can create or claim your truck profile and see booking opportunities.
- Premium tools like map/live location and ordering are optional later.
- Want me to send the truck link?

Restaurant / bar script

- MealScout helps local food spots make menu, hours, photos, and specials easier to find.
- You can start with a free profile.
- Premium tools are optional if you want more control later.
- We are building the local food network territory by territory.
- Want the owner signup link?

Objections

- Already use Facebook: Good. MealScout makes important food info easier to find and act on.
- How much: Joining is free. Premium tools are optional.
- Guarantee traffic: No. It gives people cleaner discovery and booking paths.
- I'm busy: I can send the link and Thomas can help if you move forward.

Host fee explanation

- Hosts set the host price.
- Host price can be \$0 or paid.
- Every confirmed booking still carries the MealScout booking fee.
- Truck pays host price plus MealScout fee.
- A free host price does not remove the platform booking fee.

Do not say

- Paid ranking.
- Guaranteed traffic.
- Hosts pay MealScout.
- Booking requests are paid.
- Food trucks appear on the map for free.
- Awards can be bought.
- QR codes.

Facts to memorize

Topic	Correct answer
Food truck map/live location	\$25/mo Premium, not free.
Host signup	Free. Host sets price and availability.
Truck booking	Truck pays host price plus MealScout booking fee.
Host price \$0	Truck still pays MealScout booking fee on confirmed booking.
Premium tools	Ordering, specials, schedule tools, live location, social auto-post, analytics.
Golden Plate / Fork	Earned trust tools, not paid placements.
Affiliates / credits	Use customized affiliate tag. No tag means you must report contact for manual credit review.
Private chefs / caterers	Expansion lane. Do not quote pricing until terms are locked.
Suppliers / price tools	Expansion lane. Do not quote pricing until terms are locked.

Who fits this role

- Local connector.
- Can reach trucks, bars, restaurants, churches, lots, venues, property owners.
- Comfortable texting, calling, DMing, walking in.
- Can follow a system.
- Does not overpromise.

Daily rhythm

- Build host list.
- Contact hosts first.
- Send correct tagged link.
- Report every result immediately.
- Follow up same day if interested.
- Use host spots to contact trucks.
- Escalate hot leads to Thomas.

Minimum beta targets

- 15 host prospects/day.
- 10 host contacts/day.
- 5 truck contacts/day once host inventory starts.
- Every conversation reported.
- 1-3 activated host locations/week beats random signups.
- Confirmed bookings are the proof metric.

Scorecard

Metric	What it means
Host prospects added	New possible host locations found and logged.
Host contacts	Actual host conversations started.
Host links sent	Host signup/explainer links sent with rep tag.
Host locations activated	Host account/location started or ready for Thomas.
Truck contacts	Truck conversations using host opportunities as leverage.
Truck links sent	Truck claim/signup links sent with rep tag.
Proof submitted	Screenshots/photos/notes sent for every contact.
Manual credit reports	Raw-link contacts reported with enough detail to match later.
Confirmed bookings	Host-truck bookings completed or ready to complete.

Final rule

A rep wins by creating visible motion: the right person contacted, the right tagged link sent, proof submitted, and the next action clear. Host inventory first. Trucks second. Bookings prove the territory.
